

The Nature Learning Experience Begins...

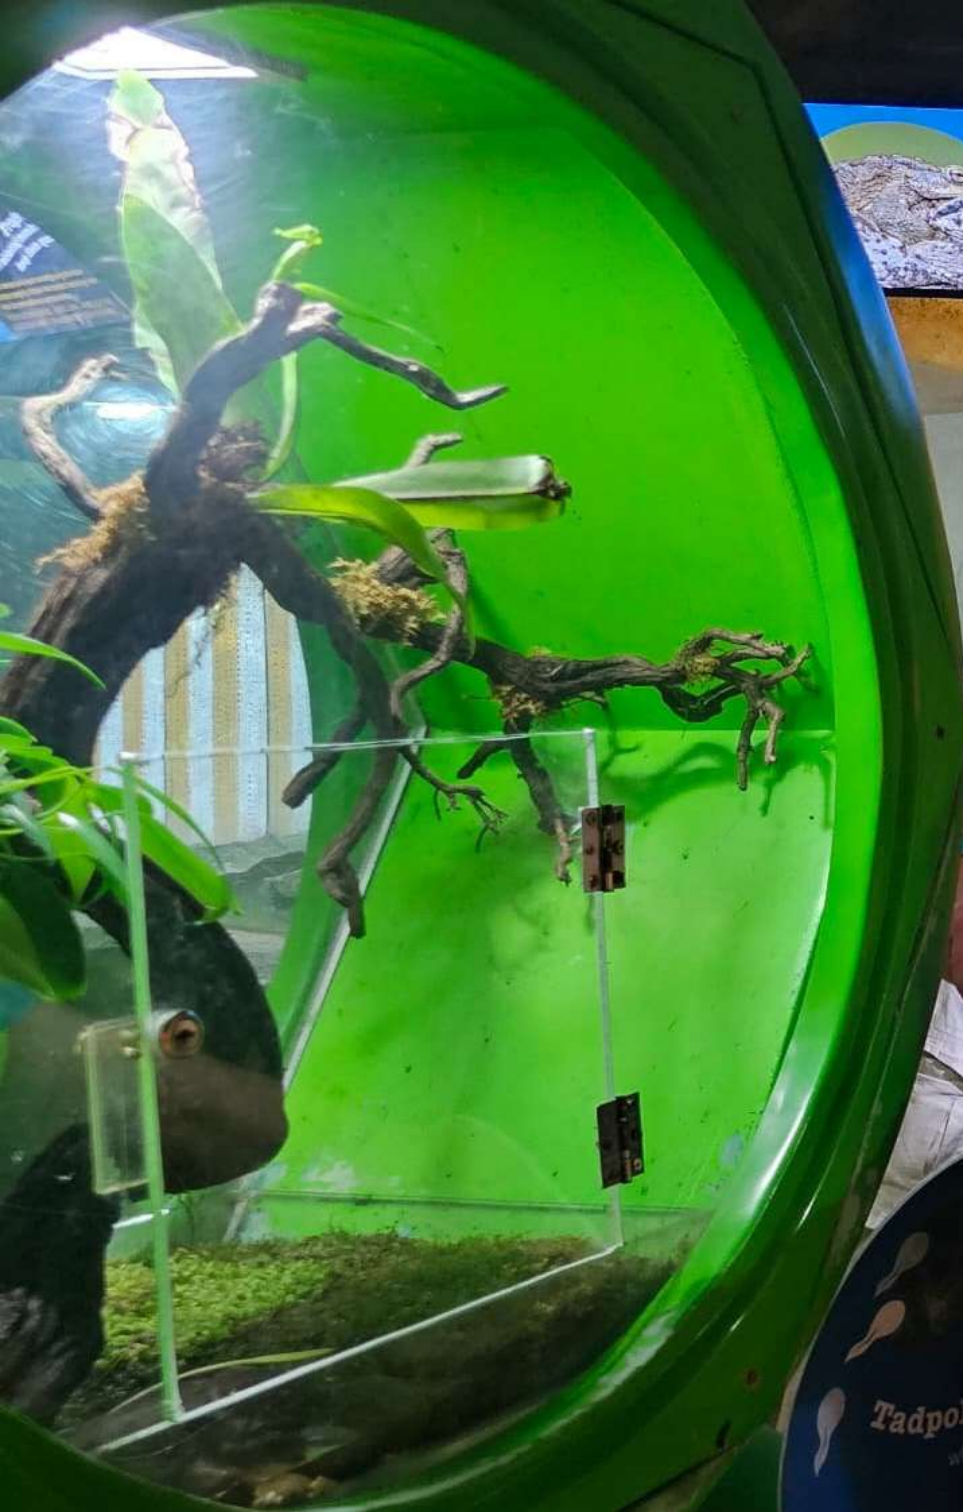

Most **Toads** have shorter legs and their skins are rougher & bumpier  
Kaki kodak lebih pendek, kulit kodak lebih kasar dan bengkak.  
Most **Toads** have large parotoid glands  
Kelenjaran kodak yang besar.  
Kulit kodak mempunyai banyak kelenjar beracun untuk melindungi kodak dari pemangsa.  
Kodak kodak adalah kodak yang paling banyak ditemui di Indonesia.

Tadpoles are the young stage of a frog or toad which live in water and breathe through gills.
