

DISCOVER A World Of Insects

Entopia is a center for nature learning that brings together the best of the invertebrate and plant worlds, allowing everyone to experience the harmony of nature. Within Entopia lie two worlds: Natureland and The Cocoon. Natureland is a living garden vivarium – a shared ecological space where a variety of animals, from invertebrates to reptiles, thrive in their re-created natural habitats. It is also the largest butterfly garden in Malaysia, home to more than 10,000 free-flying butterflies at any given time. The Cocoon is an indoor discovery center featuring two floors of interactive exhibits and activities that encourage visitors to explore and engage in fun learning experiences. Nature activities are available at scheduled times throughout our opening days.

Come and explore the secrets and wonders of the amazing, minuscule world of invertebrates!
